

Sir: I wish to submit the following comments in addition to earlier comments sent.

It has come to my attention that you have received many form letters in opposition to RM-10352. This is somewhat troubling to me because it indicates that there are a small minority (or one individual) that has no desire to follow the voluntary ARRL band plan. To me this is the best indicator of what is to come if you do not act in favor of RM-10352. It seems clear to me that action by the FCC will be required to eliminate this type of activity by a small minority.

RM-10352 as submitted is exactly what the Voluntary ARRL Bandplan has proposed but it needs teeth that only the FCC can provide.
